

# FLEXIBLE BOLLARD

## Product Description:

Flexible bollard made of materials under strict European regulations free of heavy metals, harmful elements and contaminants. It allows it to withstand large impacts, returning to its original form since it has high memory properties in shape and resistance. The bollard resists being ran over by vehicles, recovering its total verticality and original figure.

## Functional Features:

- Hardness ° Shore A 92.
- High resistance to abrasion.
- Great ecological value and 100% recyclable.
- Environmentally friendly.
- High impact resistance.
- Excellent UV behavior.
- Low cost and durable.
- It is not painted, it does not rust and it does not dent.
- Maintenance free.

## Anchorage

Built-in directly to the ground

## Reflective material:

Equipped with a 3 cm wide level II 3M prismatic tape in accordance with Standard UNE 135.363 and with European Standard EN 471

## Colors:

Black, Green and Red
