

FT - TECHNICAL SHEET

GUARDRAIL REFLECTOR FOR METAL BARRIER

Characteristics:

Guardrail reflector for fixation in metal barrier.
Type R2 Class 2 according to standard
EN 12899-3.

Catadioptric Plates:

With catadioptric plates in optical
Polycarbonate with high scratch hardness.
New retro-reflectors in good condition have a
retro-reflection higher than that of Class 3
(D.G.) film of the best brands.

Retroreflection measurements:

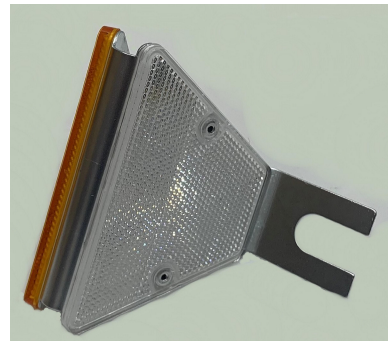

White color plate: 740 candelas.lux1.m2
Clasification R2 Class 2 according standard
EN 12899-3.

Bracket for attaching to bionda:

Metallic support in hot-dip galvanized steel
with high resistance to environmental
corrosion and saline environment.

Dimensions and Weight:

Base 120mm x width 70mm
Reflective surface 54cm2
Weight set: One face 113 gr; Two faces 252gr.
