

FT - TECHNICAL SHEET

A4	BERLINER CUSHION	BERLIN15090
	Berliner cushion composed of four parts covering an area of 900mm to 1500mm in length and width. The 1500mm width makes ambulances and adapted cargo vans not affected by the speed bump. On the contrary, the smaller size of compact cars forces them to moderate their speed.	08-09-17
1:12	The height of this speed bump is 50mm. Normalized to speed limits of 30Km/h. The areas painted in yellow, light reflective, are coated with a highly effective anti-slip material. The set of four pieces of the speed bump is set with a total of 18 fixations with nylon plugs 12 x 100mm and 10x100mm steel screws.	SC
